BSI Certificate for ABUS Pfaffenhain Systems Y14 and Z14

Jahnsdorf – 2 May 2011 –

As of now the two ABUS Pfaffenhain systems “Y14“ and “Z14“ are available with the worldwide recognized certification of the British Standards Institution (BSI). These two products are distinguished for a patented inner key stop, a similar patented anti-bump pinning, an increased drill protection as well as a special pre-snap function.

For many international customers the BSI certificate is an important sign of quality regarding the choice of security products. “Standing alongside the German VdS standard representing the highest demands in Germany, the BSI kite mark also guarantees audited top products to customers in the international market. “, explains Sebastian Müller, R&D Director of ABUS Pfaffenhain.

The prestigious “BSI Kitemark“ is a protected certification mark which has already been used since 1903. It honours products across the world which stand for highest quality. Biannually audits by the British Standards Institution prove and guarantee the constant high manufacturing quality of ABUS Pfaffenhain certified systems to the customer.
